Precision Engineering Company Limited

Environmental Policy

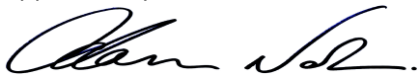

Belmont Precision Engineering Company Limited exists to meet the requirements of its customers by manufacturing CNC machined components to customers own design and material specifications.

Belmont Precision Engineering Company Limited is aware that its operations have an impact on the natural environment. We are committed to controlling these impacts, by identifying them and by identifying methods of controlling them as far as reasonably practicable.

Belmont Precision Engineering Company Limited will:

- At a minimum, ensure compliance with legal obligations and review the compliance to legal environmental requirements annually.
- Identify aspects of the business that impact the environment that we can control or influence, take all reasonable steps to ensure that any incidence of pollution is prevented, and the protection of the natural environment is safeguarded.
- Minimise energy, water, material use, and the generation of waste from the company's activities.
- Ensure that waste products are handled in an appropriate manner by reputable contractors.
- Continuously improve our environmental performance and awareness.
